

# FE535

## Retenedor electromagnético de 490N para montaje en pared.

### General

---

The FE535 is a VdS approved magnetic door holder with a steel, square base.

### A magnet for all occasions

---

The 500 series door holding magnets are the result of years of specialised development. With low power consumption the magnets are still able to produce very high holding forces. All magnets have a spring-loaded pin to ensure ejection against remnant magnetism.

### Application friendly

---

This square steel base model offers a cost effective solution without sacrificing performance. The FE535 is supplied without keeper plate. This may be ordered separately depending on the application.

### Installer friendly

---

For practical ease of installation, all units are complete with electrical termination. Protection diodes prevent electromagnetic pulses, and reverse polarity protection speeds up installation. The boxes are predrilled in a practical, standard format for rapid mounting.

### Approvals

---

All models are VdS approved. (Refer to the specific device specifications)

### Details

---

- Wall mount
- Low power
- 490 N holding power
- 100% duty cycle
- Anti-remnant ejector
- Protection diode and reverse polarity protection
- VdS approved

# FE535

Retenedor electromagnético de 490N para montaje en pared.

## Technical specifications

---

### General

---

Fuerza de retención N (Newtons) 490

---

Botón de liberación No

---

Protección contra inversión de polaridad Yes (diode)

---

### Eléctrico

---

Tipo de fuente de alimentación 24 VCC

---

Consumo de corriente 1.5 W

---

Consumo de corriente 62.5 mA

---

### Físico

---

Dimensiones físicas 50 x 30 mm (Ø x H)

---

Entradas de cable 1

---

### Medioambiental

---

Clasificación IP IP30

---

### VDS Coil

---

Yes

---
