

120-2009

(25 pack) GP2P, Blank, SC20, 36B, LC1

Overview

The G-ProxII family is Verex's line of proximity access control. The G-ProxII proximity access cards permit convenient contactless operation without the wear of a physical contact card. They are available blank (un-programmed) or in industry standard 26 bit format or the exclusive 36 or 40 bit formats. All G-ProxII cards and keychain tokens are fully compatible with all of the G-ProxII proximity reader line.
