

# VVI740

## Configuration cable for VVS700 series

### Configuration cable

---

The configuration cable VVI740 enables the VVS700 series seismic detectors and the computer to communicate. A serial communication port, RS232, is required on your laptop. The cable is the only installation tool the installer needs when configuring the detector.

### Details

---

- One configuration cable for all installations

# VVI740

## Configuration cable for VVS700 series

### Technical specifications

---

#### General

---

Accessory group	Seismic sensors
Type	Cable

---

#### VVI740

---
